

Compliance with Standards

CAAC: AC-137-CA-2015-03& 01
SAC: GB/T 7256
ICAO: Annex 14, Volume I
IEC: TS 61827
FAA: AC 150/5345-46 & EB 67
NATO: STANAG 3316

Application/Use

I、 II、 III Type Runway Guard Light

Features

- Comply with ICAO chromaticity and photometric requirements, alternately illuminated at the rate of 45-50 flashes per minute
- Strict LED color management ensures color consistency
- Long life, energy saving and maintenance free of LED light will bring great economic benefits to customers
- Glass equipped with a visor provides anti-dazzle prevention for pilots at a close range
- The control circuit design with multiple protection functions to ensure reliability service
- Compact structure and attractive appearance, with small windward area and strong ability against the gales
- Split-type lighting fixture with lamp holder of fully enclosed structure
- The main body is made of aluminum alloy with anti-corrosion surface, all fasteners are made of stainless steel, suitable for harsh environment application
- High-precision parts and components machining to ensure all dimensional quality and precision
- Forged frangible device with precise machining, complying with FAA standards, ensuring good stability and reliability
- IP65-grade protected from total dust ingress
- The calibrator can be installed directly on the body with high precision`
- Equipped with chains to prevent lights which have broken from their mounting from blowing away

TYPE _____
EUL-RG = Elevated runway guard light

Intensity _____
H = High intensity

Light source _____
LED = LED Source

Power supply _____
066 = 6.6 A
036 = 36 VDC
CSB = 6.6 A + Battery

Color _____
Y = Yellow

Optional _____
M = Single light fault detection function

* Please describe the installation of the lamps and lanterns in detail with your order
Spare parts and accessories need to be ordered separately and order number is required with your order.
